

Livestream Assistant Technician Internship

Description

With the launch of the new 'ACM Student Showcase' livestream, we have an exciting opportunity to offer two internship placements at CapsaArx Studios in Kings Norton, Birmingham.

We are a recording and rehearsal studio that have joined forces with our partners and neighbours 'Birmingham Rockschool' to make use of their stage and our recording equipment to bring a 5-angle, fully mixed video livestream service to bands and artists.

We're teaming up with ACM to bring our professional streaming service to the students, hosting a showcase performance livestream once a month and we are looking for dedicated interns to gain some valuable experience assisting to run these events alongside our team.

Responsibilities

- Assist with setting up the stage
- Setting up microphones and DI boxes as required
- Helping to patch cables into the desk
- Assist the sound engineer with live sound mixing

- Assist the videographers with setting up cameras
- Operate the cameras throughout the livestream, switching between them as required

Requirements

You must be a current student at ACM. A basic knowledge and understanding of some live sound production would be ideal for this role. There is an opportunity to get some real hands on experience of mixing a band live, learning about video production and real time shooting, with a potential for future paid work.
